

Membrane PV Coupling Solutions

EuroTec manufactures corrosion-resistant couplings specially designed for membrane pressure vessels. Our couplings are engineered for all types of water treatment applications from low pressure (300 psi) to super high pressure (2300 psi) and pipe sizes from 1" to 4" diameter. EuroTec couplings are designed to work with all types of membrane pressure vessels but are 100% compatible with FirstLine brand pressure vessels.

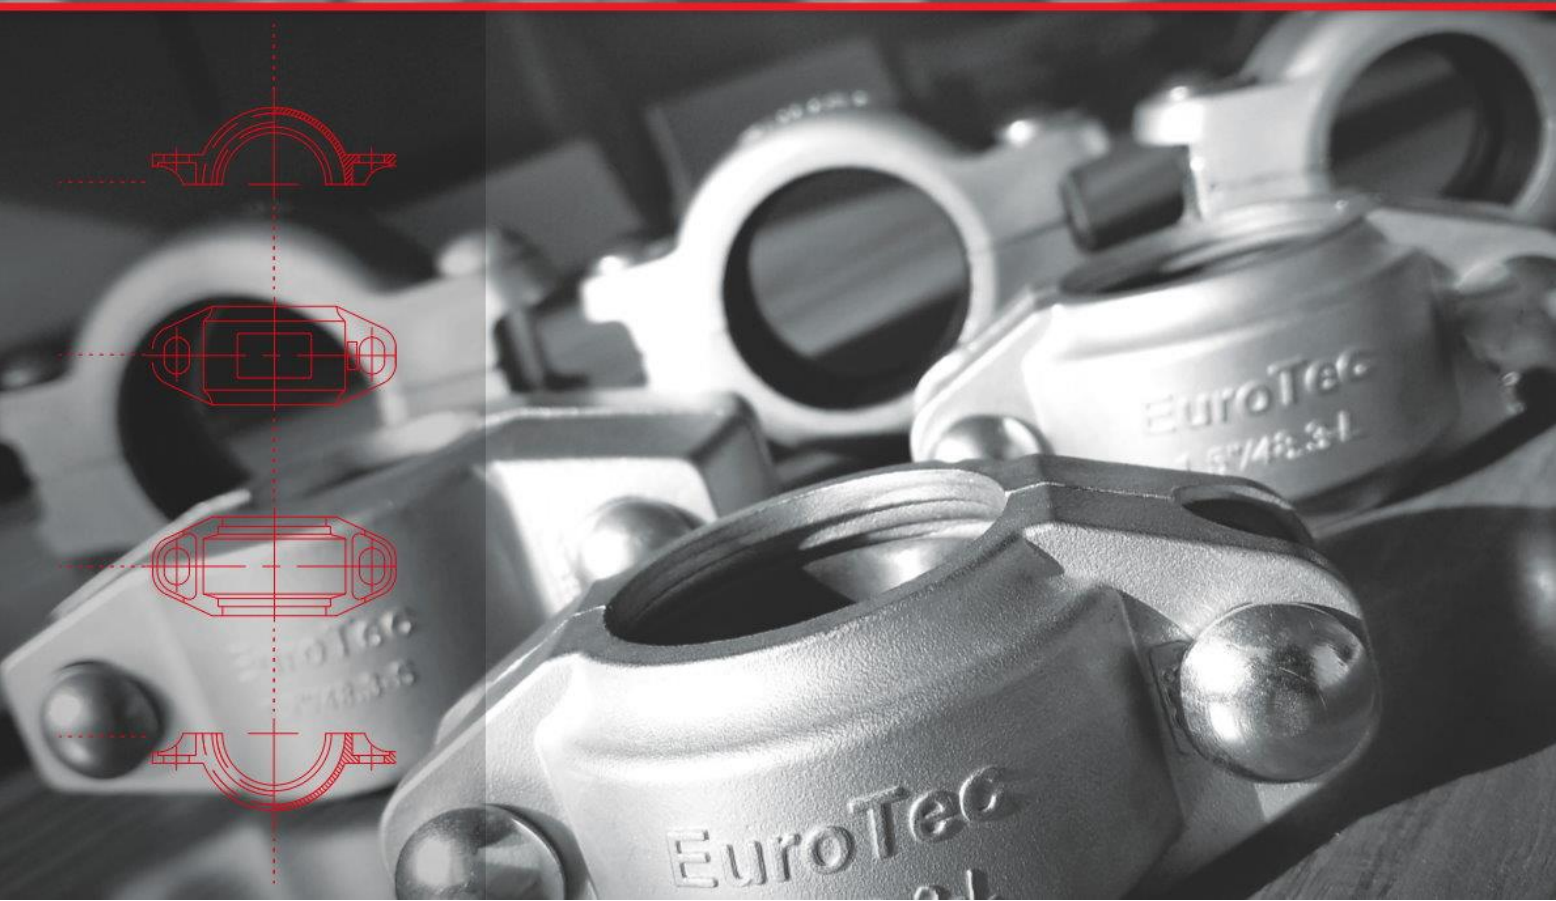

Rapid Install

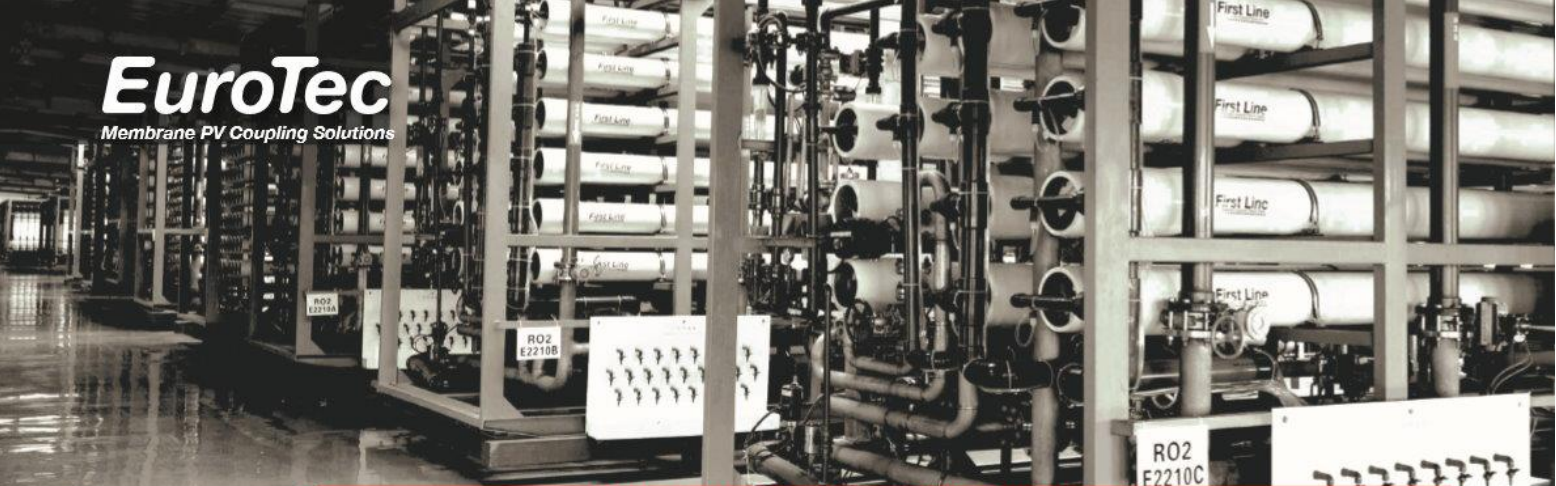

EuroTec couplings are engineered for quick and easy installation.

Dependability

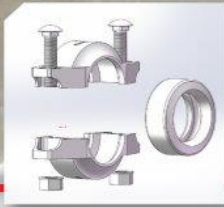

Superior strength and durability guaranteed to last the life of the installation and eliminates the need for periodic services.

EuroTec · Great Value · High Performance · Reliability
